Georgia Tech Web Development Bootcamp (On going)

JUN 2020 – NOV 2020

University of Georgia

Athens, GA

AUG 2016 – MAY 2020

NOTABLE WORK IN WEB DEVELOPMENT

1. Pandemic Effects on News Headlines

- A dashboard allows the user to search for a keyword and compare the news landscape before and during the COVID-19 pandemic
- Worked in a group of 4
- The user can choose “The New York Times” and “The Guardian” to be their news source
- The user can select a time frame for the news source between short-term and long-term to compare the associated words
- The dashboard has a search bar for the user to enter a keyword and a dropdown menu for the user to choose a news source
- This project was made using Materialize CSS, the New York Times API, the Guardians API, Moment.js, and JQuery. HTML, CSS, and Javascript were also used.
- It is deployed on GitHub at: <https://cotec4.github.io/Pandemic-Effects/>
